PROFESSIONAL EXPERIENCE

Department of Veterans Affairs (Hybrid Enterprises)

ICAM DevOps Engineer | Public Trust — March 2026 - Present | St. Cloud, FL

- Wrote SQL queries against Saviynt and automated them with Python and PowerShell to flag orphaned accounts, terminated users, and 90+ day inactive accounts, cutting quarterly audit prep from hours to minutes.
- Reconciled identity records across multiple data sources and validated query logic on sample sets before full runs, preventing false positive deprovisioning of active users.
- Monitored identity lifecycle operations across Saviynt IGA and Microsoft Entra ID, enforcing RBAC and least privilege controls across VA enterprise ICAM systems supporting federal compliance with NIST SP 800-53.
- Investigated alerts and analyzed logs in Splunk and Azure Sentinel to sustain reliability for VA enterprise authentication and access services.

IAM / IGA Engineer | Public Trust — July 2025 - March 2026 | St. Cloud, FL

- Prioritized a 30,000+ user access recertification (up 65%) by risk, resolving orphaned and separated accounts first to finish within one week.
- Administered Saviynt IGA for identity governance at the VA, managing Joiner Mover Leaver workflows, user provisioning, deprovisioning, access recertification, and RBAC enforcement across ICAM enterprise systems.
- Managed authentication and authorization across Okta, Entra ID, Azure AD, SAML, OAuth, and LDAP, triaging SSO failures, MFA issues, and provisioning incidents through ServiceNow.
- Maintained audit-ready compliance documentation aligned with RMF and FISMA supporting access reviews, control testing, and evidence collection for federal security assessments.

United Data Technologies (4 Corner Resources)

Technical Support Specialist / IT Quality Repair Technician | (Contract Role) — May 2025 - June 2025 | Orlando, FL

- Maintained detailed documentation of diagnostics and test outcomes, ensuring traceability and audit-ready records across the service lifecycle.
- Resolved hardware, software, and account access issues via ConnectWise, including password resets and account lockouts through Active Directory.

PROJECTS

Orphaned Account Detector | Python, CSV, datetime, csv modules

- Developed a Python automation tool that ingests identity export data, calculates account inactivity, and flags dormant or orphaned accounts exceeding a configurable threshold, generating a structured audit report to support access/deprovisioning workflows.

Security Pipeline | Bash, GitHub Actions, Docker, gitleaks, pip-audit

- Built a reusable CI/CD security pipeline that automatically scans repositories for hardcoded secrets and vulnerable Python dependencies on every push, aggregating findings into a structured markdown report and failing the build on detection.

SKILLS

- **Identity & Access Management**: Saviynt, Microsoft Entra ID, Microsoft Azure, Active Directory, SAML, OAuth, RBAC, LDAP
- **Infrastructure & Monitoring**: Linux, Windows, VMware, Hyper-V, ServiceNow, AWS, Docker
- **Security Tools**: Nmap, Wireshark, Burp Suite, Nessus, Metasploit, Trivy, Splunk, Kali Linux, Azure Sentinel
- **Compliance & Accessibility**: ISO 27001, Section 508 Testing, ANDI, JAWS, HIPAA, NIST Cybersecurity Framework, RMF
- **Programming & Scripting**: Python, PowerShell, Bash, Java, SQL, Git, Jira, JavaScript, Typescript, Playwright, pytest
- **DevOps & Automation**: PowerShell/Python Automation, CI/CD Pipelines, Terraform, Kubernetes, Ansible, Jenkins

CERTIFICATIONS

CompTIA Security+ | CompTIA Network+ (In Progress) | AWS Academy Cloud Security Foundations | AWS Academy Cloud Foundations | CompTIA Linux+ (In Progress) | Saviynt IGA Level 100 & 200

EDUCATION

University of Central Florida

- **Master of Science** - Cybersecurity and Privacy (Expected May 2027)
- **Bachelor of Science** - Information Technology (2025)
- **Awards** - President's List / National Scholars Award / Dean's List
